

**NOTICE!** On Friday May 27, 2005 one of the eaglets died from unknown causes. It is not uncommon for eaglets to die in the early stages of development. Death may occur from natural causes, predators, competition for food, or even Fratricide (killing of one's sibling). If you need more information concerning the Souse Gulch Eagle Nest contact Park Ranger Mark Andreasen, Phone: 406.293.7751 x253 or Email [mark.j.andreasen@usace.army.mil](mailto:mark.j.andreasen@usace.army.mil)
